

Nipper/Take2 in the Cloud

Anywhere, Anytime

Adapt IT is pleased to advise that Nipper and Take2 Access Edition are available in the Cloud. That means you can use these products on a wide range of devices – Windows desktop computers, Mac Book Pros, iPads, Android tablets, etc. – wherever you are, as long as you are connected to the internet. Have the benefits of a reliable, compliant and supported student management system, without being tethered to your desk.

Automatic Updates

Our products are always up to date with the compliance requirements from bodies such as the Ministry of Education, the Tertiary Education Commission and the New Zealand Qualifications Authority meaning you will never have to worry about being caught out. You can also access the latest version of Microsoft Office in the Cloud.

Safe and Secure

Your access in the Cloud is secure and your data is safe because it is backed up automatically. However, you can retrieve your Nipper and Take2 database back to your own system at any time. We don't lock up your data, unlike some systems.

Benefits

- Compatible with Microsoft and Apple computers – even use tablets to quickly record outcomes and attendance.
- No need to buy and maintain a server.
- You don't have to pay a third-party technician or in-house staff to set up and manage Nipper/Take2.
- You don't have to worry about Microsoft releasing a new version of Office or Windows.
- If you wish you can run other applications in the Cloud alongside Nipper/Take2. For example you could have access to Word, Excel and other Microsoft products. There is a small extra charge for this but it is cheaper than having to buy and install new versions of Office yourself.
- You no longer have to worry about updating to new versions of Nipper/Take2, this is done for you. You will continue to receive our communications, release notices and documentation in the usual way.

- Adapt IT continues to provide its renowned support along with access to the usual tools. In fact it is easier as we can view your data without you having to zip up and email it to us.
- Your data is securely backed up in the Cloud for you. Simply exit your Nipper or Take2 session and the data is safe.

Set-up and Support

- Adapt IT works with ITCo Solutions, a Rotorua based company that delivers cloud services at high speed through fibre.
- ITCo ZoomCloud offers the best in private cloud computing, fully licensed with the latest Microsoft software.
- ITCo will work with you to set up your users in the Cloud using the version of Nipper/Take2 that best suits your needs.
- ITCo will invoice you monthly on a per-user basis.
- Adapt IT will set-up your Take2 database in the Cloud and install all updates.
- Adapt IT will continue to provide support through our Help Desk including handling calls about the Cloud service.

Pricing
