

Nipper Student Management System

Ease of Use

Nipper has been designed from the outset to be user-friendly and intuitive to use, and easy and straightforward to install. Nipper uses Microsoft Office™ products to ensure it will work on the maximum number of workstations with the minimum of fuss.

Compliance

Nipper is enhanced with the latest requirements from bodies such as TEC and NZQA. Their requirements for information changes frequently but Nipper will be one step ahead meaning you will never have to worry about not being compliant with the latest changes.

Has a bulk upload facility designed for TEC's new Literacy and Numeracy tool. This allows you to submit the required information of your learners without duplicating data entry.

Functionality is available for the recording of student attendance. It is now possible to record the absences of your students in increments as small as a tenth of a day.

Value for Money

Not every tertiary education provider has the budget of a university or a host of IT support staff looking after your IT environment. Nipper is a cost-effective system with no need for specialised servers, frequent upgrades or expensive 3rd party software.

Nipper is a student management system designed for smaller New Zealand tertiary education providers. We have been producing student management systems since 1998 and Nipper meets the needs of unfunded private training establishments.

If your organisation moves to receiving TEC funding you can seamlessly upgrade to our Take2 system without any data loss or business interruption.

Running Nipper in the Cloud

Nipper is available in the Cloud. That means staff can use Nipper on a wide range of devices, wherever they are, as long as they have an internet connection. Your workstation must have the following specifications to access Nipper in the cloud.

- Runs Windows 7 SP1 or later (32bit or 64bit).
- Has at least 4 GB RAM.
- Has a monitor that can display at least 1024 by 768 screen resolution.
- Is connected to the Internet (to report to NZQA and the National Student Index electronically).
- Has Microsoft Access 2010 SP2 or later installed (32bit only).

Benefits of Cloud

- Access Nipper with Windows or Apple computers, even use tablets to quickly records outcomes and attendance.
- You don't have to buy and maintain a server—no CAPEX spend.
- No third party technician or in-house staff required to set up Nipper and manage updates.
- New releases of Microsoft Office or Windows taken care of.
- You can run other applications in the Cloud alongside Nipper. For example you could have access to Word, Excel and other Microsoft products in the Cloud—this at a lower cost than having to buy and install new versions of Office yourself.
- You no longer have to worry about installing or updating Nipper. We do it for you and send you the release notice and documentation in the usual way.
- We continue to provide our renowned support, including using TeamViewer. We can even review your data without you having to send us your Nipper data-base.
- Your Nipper data is securely backed up in the Cloud. Simply exit your Nipper session and the data is stored and backed up.

Interested in viewing our Nipper student management system?

If you're interested in seeing Nipper in action, feel free to contact us to arrange for an online demonstration. All you will need is a computer connected to the internet. We will be more than happy to answer any questions you might have.

About Adapt IT Australasia

Adapt IT Australasia Limited, a New Zealand registered company since 2009, is a subsidiary of Adapt IT Holdings Limited, which is registered in South Africa and listed on the Johannesburg Stock Exchange. Adapt IT has been involved in the education sector for more than 30 years and has in excess of 200 education sector clients worldwide. Adapt IT Australasia joined forces with Meta Office in 2016. This allows us to meet the requirements of a diverse range of institutions, from the smallest Private Tertiary Establishments, Polytechnics and Wananga to large Universities.
