

Tip Sheet No.36

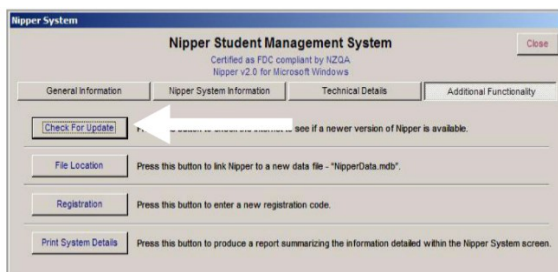

Checking for Nipper Updates

Periodically Adapt IT makes updates for Nipper available for download from the website.

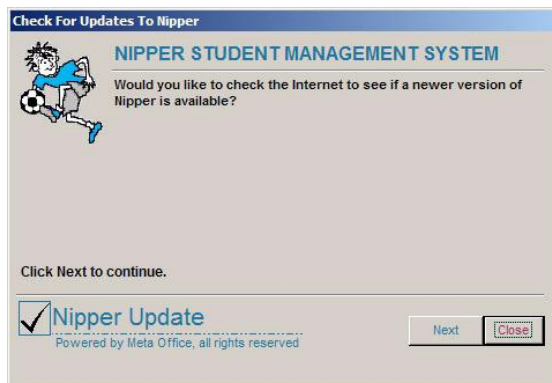

These updates may include new functionality, fixes for known bugs in the software and/or requested functionality from providers. It is a good idea to check regularly for updates – as they could fix or prevent problems in the future.

Checking if an update is available

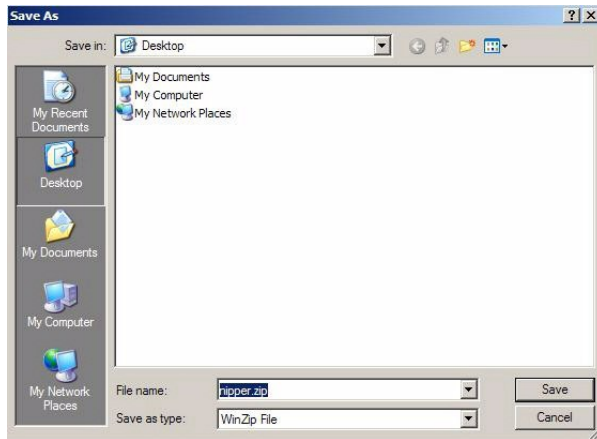

1. Click on the **Nipper System** button.
2. Click on the **Nipper** button.
3. Click on the **Additional Functionality** button.

4. Click on the **Check for Updates** button.

5. Click on the **Next** button.
6. If an update is ready for download the Update button will become available. Note the old and new version numbers.
7. Click on the **Update** button.
8. Click on the **Download** button.
9. Click on the **Save** button.

10. Specify a location to save the update file. Make sure that you can find the file again!
11. Click on the **Save** button.

12. Wait for the update to finish downloading.

Verifying the front-end location

In order to apply the updates verify the location of the front-end (Nipper Main and Admin modules) files.

1. Click on the **Nipper System** button.
2. Click on the **Nipper** button.
3. Click on the **Additional Functionality** button.
4. Click on the **Nipper System Information** button.
5. The front-end location will be listed here.

Note this location down – as it will be required to apply the update. In the example above the front-end is located in the Nipper folder on the C:\ drive.
